

## **Cabled-8\_RR1713-RR1717\_Discrete\_Summary Information:**

### **File Mapping:**

Hex files were renamed from the original ship-provided files for consistency and ease of processing. Original file names are listed below on the left, with corresponding new file names on the right. Original Hex files are accessible for each cruise in the Cruise Data folder under the “Ship Data” sub-directory. Bottle files used to populate the discrete summary can be found in the Water Sampling sub-directory under “ctd\_proc”.

CTD01 = RR1713\_CTD-001

CTD02 = RR1713\_CTD-002

CTD03 = RR1713\_CTD-003

CTD04 = RR1713\_CTD-004

CTD05 = RR1713\_CTD-005

CTD06 = RR1713\_CTD-006

CTD07 = RR1713\_CTD-007

CTD08 = RR1713\_CTD-008

CTD09 = RR1713\_CTD-009

CTD10 = RR1713\_CTD-010

CTD11 = RR1714\_CTD-011

CTD12 = RR1714\_CTD-012

CTD13 = RR1714\_CTD-013

CTD14 = RR1714\_CTD-014

20170727\_2324 = RR1713\_J2-970\_20170727\_2324

20170823\_0900 = RR1715\_J2-1008\_20170823\_0900

20170825\_2300 = RR1715\_J2-1011\_20170825\_2300

### **Summary Notes:**

RR1713 – RR1715, CTD-001 – CTD0914, CTD Fluorescence Flag, CTD Beam Transmissometer Flag, “No calibration information available”

RR1713, CTD-004, Cast Flag: “2-minute hold at 10 meters”

RR1713, CTD-005, Cast Flag: “No hold at 10 meters”

RR1714, CTD-014, Cast Flag: "Caught a bull kelp"

RR1713, J2-970, Cast Flag: "Niskin naming discrepancy between sample logs and dive logs. Niskin firing sequence estimated from order on cast log. Bottom depth missing from cast log and estimated."

RR1713, J2-970, CTD Pressure Flag, CTD Temperature 1 Flag, CTD Conductivity 1 Flag: "No calibration information available"

RR1715, J2-1008, Cast Flag: "Niskin naming discrepancy between sample logs and dive logs. Niskin firing sequence estimated from order on cast log."

RR1715, J2-1008, CTD Pressure Flag, CTD Temperature 1 Flag, CTD Conductivity 1 Flag: "No calibration information available"

RR1715, J2-1011, CTD Pressure Flag, CTD Temperature 1 Flag, CTD Conductivity 1 Flag: "No calibration information available"

#### General File Notes:

- Discrete sample fields containing text or non-decimal numbers ("DIC-###", "CH-##", "OX-###", "SA####", or "673") list sample bottle numbers and not analyzed data. Bottle numbers are included when data are not yet available, and will be replaced with analysis results as data are received from analysis labs.
- Fill value = -9999999
- Carbon analysis was provided by Burke Hales lab at Oregon State University. All Carbon parameters are provided at in situ temperatures. Calculated carbon parameters were provided by Hales using custom software routines using published values for the various carbon chemistry constants. Hale's lab provides the following references regarding constants used in the calculations. For further information, please contact Burke Hales (bhales@coas.oregonstate.edu).
  - o Carbonic acid dissociation constants: Millero (2010), with full resolution constants provided by Millero via private conversation, equal to Lueker's constants at  $S > 25$ ).
  - o  $K_w$ : Millero (1995)
  - o  $K_b$ : Dickson (1990)
  - o  $K_{sp}$  for calcite and aragonite: Mucci (1980)
  - o  $K_h$ : Weiss (1973)
  - o Alkalinity is modeled as:  $HCO_3^- + 2CO_3^{2-} + B(OH)_4^- + OH^- - H^+$

## Data Flag bit maps:

Bit Position	Cast Flags	CTD File Flags	CTD Parameter Flags	Niskin Flags	Discrete Sample Flags	Discrete Replicate Flags
0	Notes/Other	Notes/Other	Notes/Other	Notes/Other	Notes/Other	Notes/Other
1	Delayed start to data collection	Data cast only, no Niskins triggered	Not calibrated	Bottle information unavailable	Sample for this measurement was drawn from water bottle but analysis not received	Duplicate analysis on same sample
2	Acceptable; normal cast according to SOP	Acceptable; file processed according to SOP	Acceptable measurement	No problems noted	Acceptable; sample processed according to SOP	Single sample
3	Non-standard winch speed	File processed using modified parameters	Questionable measurement	Leaking	Questionable measurement	Duplicate analysis from same Niskin
4	Non-standard surface soak time	File processed using alternate XMLCON	Bad measurement	Ran out of water during sampling	Bad measurement	Triplicate analysis from same Niskin
5	Non-standard bottle soak time before Niskin trip	Missing scans as indicated by modulo error counts	Not reported	Vent open	Not reported	Unassigned
6	Sensor issues but cast completed and data collected	Missing metadata	Calibration coefficients > 1 year old	Misfire at wrong depth	Sample collected out of order	Unassigned
7	Cable issues but cast completed and data collected	Unassigned	Corresponding discrete sample	Unknown problem	Sample processed using alternative method; see notes	Unassigned
8	Winch issues but cast completed and data collected	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
9	Premature cast end with data and/or data loss	Unassigned	Unassigned	Sample not drawn for this measurement from this bottle	Unassigned	Unassigned
10	Significant ship heave	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
11	Station position not adequately maintained during cast	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
12	Tow-yo, Yo-yo cast	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
13	ROV bottle sample	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
14	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
15	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned	Unassigned
